BEAUMONT, TEXAS

Capital Stock \$1,000.000—Full Paid and Non-Assessable

2900 Acres on Hillebrandt Bayou, Just Below the Big Gushers, Owned in Fee Simple and Clear of Incumbrance

This is one of the finest rice plantations in Jefferson county, 1000 acres being planted in rice. Over \$40,000 in improvements. This property will pay from rice alone not less than 6 per cent dividends on the par value of the stock, and is the only oil stock offered to investors which is not dependent upon oil alone for dividends, and for oil purposes no better territory is to be had. It possesses all the speculative features from the oil development and safe investment from rice culture alone. Our land is in direct line between the oil field at Sour Lake and the oil pool in the Gulf of Mexico, and in the defined limits of the oil flow as traced by the government geologists, lying southwest of the Lucas well and on a continuation of the same formation. With oil seeps and gas now showing on the surface, there can be no doubt about our land being directly over the oil pool and certain to develop good wells.

A Limited Amount of This Stock Will Now Be Sold at 75c on the Dollar

The par value of our shares is \$1. We are now Officers and Board of Directors:
